## Medical Imaging Services

McKee Medical Center relies on comprehensive, state-of-the-art medical imaging technologies and expertly trained imaging professionals to fulfill its mission of delivering excellent patient care.

A leader in specialized medical care, McKee maintains an assortment of imaging tools and technologies to aid in the early detection, examination and diagnosis of various illnesses and abnormalities. Ultimately, this early detection leads to improved patient outcomes by enabling physicians to initiate treatment regimens when illnesses and abnormalities are most treatable.

McKee's medical imaging and radiology specialists work closely with physicians to provide knowledgeable interpretation of imaging tools and treatment techniques to ensure the best possible care decisions are made for each patient.

**Imaging Technologies**  
Medical imaging plays a key role in the accurate diagnosis and treatment of an array of medical conditions ranging from cancer and heart disease to orthopedics and emergency services.

Physicians refer inpatients, outpatients and emergency patients to McKee Medical Center for an array of imaging procedures including:

- Breast Imaging/Mammography services at the McKee Breast Center
- Computed Tomography (CT)
- Diagnostic Radiography Imaging (X-ray)
- Magnetic Resonance Imaging (MRI)
- Positron Emission Tomography (PET)
- Nuclear Medicine
- Ultrasound

For more information on medical imaging services at McKee Medical Center or to make an appointment, please call (970) 593-6191.
